MSIM Tuition & Financial Aid Programs MSIM Tuition, Aid & Scholarships The Early-Career, Early-Career Accelerated and Mid-Career MSIM tracks are self-sustaining/fee-based programs. Tuition is charged on a per-credit basis directly to the student. The University of Washington reserves the right to change tuition and fees without prior notice, and tuition is expected to increase in the future. Note that the cost of the MSIM program is the same for both Washington state residents and non-residents as well as the same whether you are residential or online. MSIM students are also eligible to receive financial aid to help cover the cost of tuition. Below is the tuition information for the Early-Career, Early-Career Accelerated, and Mid-Career MSIM tracks in the 2024-2025 Academic Year : MSIM Tuition Rates for Incoming / First-year students for Autumn 2024: Cost per credit = $1,074 Early-Career Accelerated track (40 credits): $42,960 Early-Career track (65 credits): $69,810 Mid-Career track (36 credits): $38,664 Rates for Continuing / Second-year students for Autumn 2024: Cost per credit = $1,016 Early-Career Accelerated track (40 credits): $40,640 Early-Career track (65 credits): $66,040 Mid-Career track (36 credits): $36,576 Additional Information Tuition is the same for all students, regardless of residency. (There are no separate rates for in-state and out-of-state tuition.) Residential and online modes share the same tuition rates. Tuition is based on the number of credits taken. Students who choose to take more credits than the number needed for the degree will pay more than the total amount listed. Please take into account that tuition increases each year. In addition to tuition, students should budget for additional fees. Student fees assessed for the previous academic year can be reviewed here and include a non-refundable registration fee for students in self-sustaining programs ($55 quarterly). These fees tend to increase annually. The MSIM program is fee-based (self-sustaining) and does not qualify for the State Employee Tuition Exemption program. Financial aid awards (loan packages) for Mid-Career MSIM students are limited to tuition only (up to 5 credits) and will not cover living expenses. Students who will need a loan package that will cover more than part-time tuition should apply for the Early-Career MSIM program options. In order to accept the offer of admission, applicants are required to pay a $500 non-refundable deposit, which will go toward their autumn quarter tuition. Financial Aid & Scholarships The structure of financial aid, scholarships and other

forms of educational support for graduate students works differently than what you experienced as an undergraduate. The good news: Aid is available for graduate school. The challenge: You need to be more proactive in researching the types of funds available and searching through a variety of funding sources. Learn more about the sources available to help fund your education: Federal and state aid University of Washington funds and resources Information School funding and scholarships External resources and scholarships Information for international students Scholarships for which MSIM students can apply Helpful Tips for Finding Aid Don?t wait until you are admitted to search and apply for funding. Scholarship deadlines tend to be in mid-winter. You may not have your admissions decisions by the time deadlines occur. Do your research! Look for funding that will match your specific goals, background and interests. Submit the FAFSA at https://studentaid.gov/h/apply-for-aid/fafsa Most loans are based on the FAFSA, as are some scholarships. The priority deadline to submit the FAFSA for the UW is Jan. 15 each year. Ask for an adjustment. Financial aid for the first year is based on your income from the previous year. Once you start school, you will probably not have the same income level if you?re no longer working or working fewer hours. When your employment status changes, contact UW Financial Aid and update them on your income. Also, let them know if you need to buy any items (such as a new computer) to support your studies. These items can also help increase your financial aid.
