Tuition, Aid & Scholarships iSchool Funding The iSchool has several types of funding available:

**Merit Scholarships** All residential and online MSIM applicants who apply by the deadline are automatically considered for a limited number of iSchool merit-based scholarships, with each covering up to a year of tuition. If there is additional information you would like to provide the committee that you feel is relevant to your being considered for a scholarship, you can use the optional Scholarship Information section in the online application. We also award select scholarships to second-year residential students.

**Endowed and Term Scholarships** The iSchool has more than 20 endowed funds for which students can apply for scholarships to cover the costs of their second year in the MSIM program. These funds come from iSchool partners including PitchBook, Coalfire, and others, and support students with interests in diversity, cybersecurity, and fintech. The scholarships application process occurs during winter quarter each year.

**Graduate Assistantships and Student Employment** The iSchool hires students for graduate assistantships that provide partial tuition reimbursement. This hiring process occurs concurrently with the admissions process. When the GA positions are posted in February, all applicants will be notified via email. Questions about the GA hiring process should be directed to the iSchool HR department at [ihrhelp@uw.edu](mailto:ihrhelp@uw.edu) . Students are also able to apply for hourly student positions at the iSchool and in other UW programs/departments: [iSchool student employment positions](#)

**Additional UW employment opportunities** [UW Graduate School financial support resources for graduate students](#)

While some funding and work opportunities are available, we always encourage applicants to plan to finance their entire education. Scholarship awards and GA hiring decisions are made shortly after applicants are notified of their admissions decision.

**Conference Travel Funding** The iSchool has funding available to defray the costs for students presenting at professional conferences, participating in case competitions or contributing to a research project that requires travel. These funds help cover registration fees, travel, room and board and other expenses associated with attending a conference. Funding is limited and is intended to help off-set the costs of students participating in these types of activities. These funds are only available for currently enrolled students, and are requested through your program academic advisor. Please see the [MLIS Student Handbook](#) for

travel forms. Students should check with professional organizations for funding opportunities. These organizations often offer scholarships for students to attend conferences. Announcements received by the iSchool for these funds are sent to the program listservs as well as posted on the Student Services blog and Facebook page.
