Early-Career Accelerated An MSIM is within your reach! No prerequisite coursework or technology experience is required. The Early-Career Accelerated MSIM track suits students who have focused academic and professional goals. This program is designed to maximize learning across a minimum of four terms and is suitable for recent college graduates or early-career professionals. Requirements 40 credits required to graduate. Four core courses. Complete one specialization or take electives to customize your learning. Additional specializations require added credits. Synthesize your knowledge and gain hands-on experience through a required Practicum, which includes three options: internship, faculty-directed research project or sponsored project. Complete the program in one year if enrolled full time. Early-Career Accelerated schedule The MSIM Early-Career Accelerated track requires 40 credits. Residential students typically complete it in one year including summer quarter. Online students should consult the portal for MSIM online for degree planning. In addition to the required foundational core courses and practicum, students can complete one specialization. Quarter Courses Autumn IMT 500 (4); IMT 580 (4); Specialization (4) Winter IMT 550 (4); Elective (3); Specialization (4) Spring IMT 570 (4); Elective (3); Specialization (4) Summer Practicum (6) Current students seeking complete degree and track information for advising purposes should visit the online and residential handbooks respectively. Focused learning with specializations In addition to the core curriculum , students may choose to focus their electives in one specialization area, or may choose electives across the breadth of the curriculum for a broad-based degree in information management. Learn about specializations you can choose in the Information Management degree program . ; Resources: Advising & Support Capstone Projects Upcoming Info Sessions Videos: Alumni at Work Request more information News iBuyers are changing real estate racial disparities, iSchool research shows Tuesday, August 13, 2024 Instant buyers, also known as iBuyers, rapidly buy and sell homes using automated models to set prices. These companies, such as Opendoor and Offerpad, can turn around cash offers in a matter of hours, and they've captured more than 5%...
